Nekropolis

Alexis: I skipped one of the stories, but all in all, I LOVED this collection. The perfect mix of bizarre, fantastic and strange circumstances and just generally good writing.

If I'd written this book, I could die a happy woman.

Molly: Abandoned.

I read the first two stories, which were compelling right up until the endings. I started the third story, realized I couldn't invest myself, and stopped.

Tim Hicks: simply because i did not deal with them does not imply those aren't reliable stories. I learn commonly sci-fi, and perhaps i used to be looking ahead to an excessive amount of of that from a longtime SF author. Instead, those are, um, what am i able to say, soft vignettes that discover glossy existence and use speculative/fantasy parts as seasoning, or even as whatever to raise the tale out of the standard simply enough. simply no longer my style. Your mileage may well vary. Void the place prohibited.

molly: a few of these tales have been extraordinarily disturbing, yet they have been virtually uniformly fascinating. i cherished it greater than china mountain zhang, which i don't believe i gave a good sufficient shake within the first place.

Andy: Technically rather well written. reliable circulate of time and velocity of such a lot stories. inventive rules and tales that jogged my memory somewhat Bradbury at times. greatest problem/complaint used to be repetition of subject matters or goods which are basically concerned or have impacted authors life. i love getting that wisdom and heritage of an author's existence and brain from their writing, yet in a suite of reports from one writer a few of these are a section strong.
